Product short description:

Bi-component shiny marina varnish STOPPANI. Made of polyester resin and polyurethan.

Specially developped for the marina atmospere. High resistance against harsh clima and salt water thanks to its elasticity.

Can be applied on all types of precious wood as acajou, above the waterline.

For a brush application use the diluant 371 and for a pistol application diluant 911.

Sold in a 0.75L container (base and hardener included).
