Simple bronze coaming lead

Product attributes:

Diameter: 8 mm, 10 mm

Product codes:

Reference: 9415/BR/XX
EAN13: -
UPC: -

Product features:

Composition: Bronze
Dimensions: 1st model : 70x41mm | 2nd model : 64x32mm
Thickness: 1st model : 12mm | 2nd model : 15mm (coaming)
rope diameter: 1st model : 8 mm | 2nd model : 10 mm
Manufacture: England

Product short description:

This **single-sheave flush-deck block in solid bronze** guides a sheet or control line through the deck or a coaming, particularly when redirecting a line below deck. Its **brass sheave** allows the rope to run smoothly and reduces friction, unlike a fixed fairlead.

The mechanism is recessed into an opening in the mounting surface, while the top plate remains visible. It is secured with four screws, and a mounting plate is supplied. Installation must take account of the rope's path and allow access from beneath.

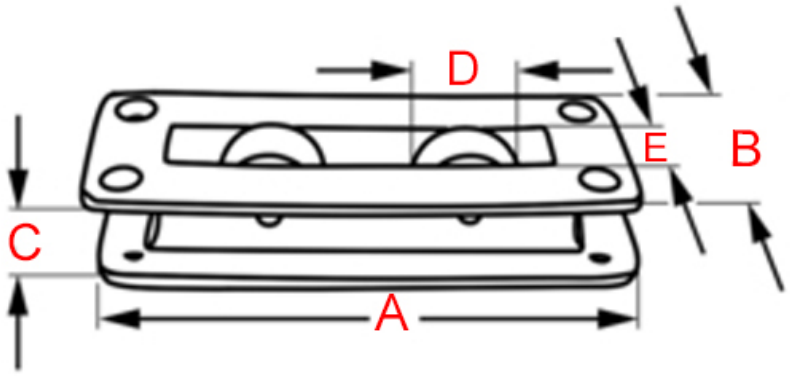
Available for **8 or 10 mm ropes**, this piece of **deck hardware** is suitable for fitting out and restoring classic sailing yachts where a discreet passage for running rigging is required.

Product description:

Specifications

- Single-sheave deck block in solid bronze
- British-made deck hardware
- For classic or traditional boats

- Fixing screws not included



Reference	Length (A)	Width (B)	Internal height (C)	Sheave diameter (D)	Sheave thickness (E)	Fixing hole centres	Fixing diameter

9415/BR/32	85 mm	50 mm	18 mm	25 mm	12 mm		

Frequently asked questions

- 1. Which fixings should I use to install this deck block?
    - Depending on the mounting surface, you can use wood screws or machine screws with matching nuts and washers for through-bolted installation. The diameter and strength of the fixings must be suitable for the fitting and expected loads.

      Please note: on wooden boats, moisture and salt water can promote electrochemical reactions involving metal fittings and timber, potentially causing deterioration of the wood around the fixings.

      We recommend using compatible marine-grade fixings, avoiding combinations of dissimilar metals wherever possible, and ensuring the installation is properly sealed.
- 2. Is this deck block available in other finishes?

- This bronze deck block is not available in other finishes.

- 3. Can this deck block be made to measure?
  - This bronze deck block cannot be made to measure.

Good to know

This deck block is handcrafted using century-old moulds, which may result in slight variations in the bronze. These characteristics give each piece its own distinctive character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, helping preserve the quality and integrity of the material over time.
