Brasse raked bollard

Product attributes:

Product codes:

Reference: 33/LA/200
EAN13: -
UPC: -

Product features:

Composition: Brass
Height: 75 mm
Width: 45 mm
Length: 200 mm
diameter of screws: M12
Manufacture: Italy

Product short description:

This **200 mm polished brass angled bollard** is designed to secure mooring lines during berthing. Its two outward-leaning posts, topped with rounded, overhanging heads, allow a mooring eye to be slipped over a post or a line to be belayed around both.

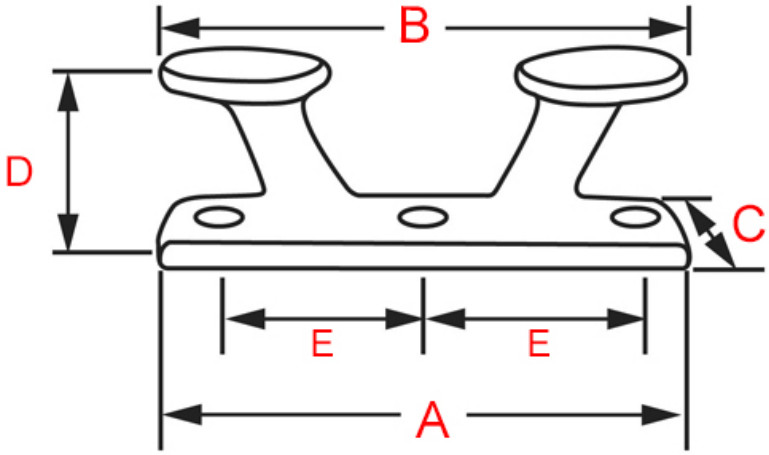
Its distinctive feature is the **concealed through-deck fixing**: two supplied threaded studs secure it from beneath the deck, leaving no visible screws on the rectangular base. Installation requires access from below and a reinforced mounting structure suitable for mooring loads.

With its polished brass finish and compact proportions, this bollard suits classic boats, particularly as a replacement where the mounting position and fixing system are compatible.

Product description:

Specifications

- Angled mooring bollard in solid brass
- Bright polished finish
- British-made deck hardware
- For classic or traditional boats
- Threaded studs, nuts and washers included



Reference	Base dimensions (AxC)	Length (B)	Height (D)	Hole centres (E)	Threaded stud diameter
33/LA/200	200 x 45 mm	191 mm	75 mm	109 mm	12 mm

Frequently asked questions

- 1. How is this bollard secured to the deck?

    - This angled bollard is secured using two supplied threaded studs, complete with matching nuts and washers, allowing through-deck installation with no visible fixings on the base. Installation requires drilling through the deck and access from below to tighten the nuts..

      The mounting surface must be sufficiently strong to withstand mooring loads. Depending on the deck structure, a reinforcing backing plate may be required to distribute the loads more evenly.

      Please note that bronze, brass and wood do not always combine well in outdoor conditions. We therefore recommend using stainless steel fasteners or, where appropriate, brass fasteners.

- 2. Is this bollard available in other finishes?

- This angled mooring bollard is also available in chrome-plated brass on our website.

- 3. Can this bollard be made to measure?
  - This angled mooring bollard cannot be made to measure.

Good to know

This bollard is carefully handcrafted, which may result in slight variations in the brass. These characteristics give each piece its own unique character and authenticity.

Solid brass offers excellent durability and resistance to marine conditions. However, brass naturally changes in appearance over time. As this bollard is made from **unlacquered polished brass**, its original bright finish will gradually develop a patina.

Exposure to air and moisture causes the brass to oxidise naturally, creating variations in colour and tone. Regular polishing will restore its original shine. Discover our range of cleaning and maintenance products.
