
Bronze jamb cleat

Product attributes:

Size: 75 mm, 100 mm, 125 mm, 150 mm, 175 mm

Product codes:

Reference: 1073/BR/XX
EAN13: -
UPC: -

Product features:

Manufacture: England

Product short description:

This **solid bronze jamming cleat** allows a sheet, halyard or other control line to be secured quickly without tying a knot. The rope is held by wedging it beneath the cleat's curved hook and can be released quickly when adjustments are needed.

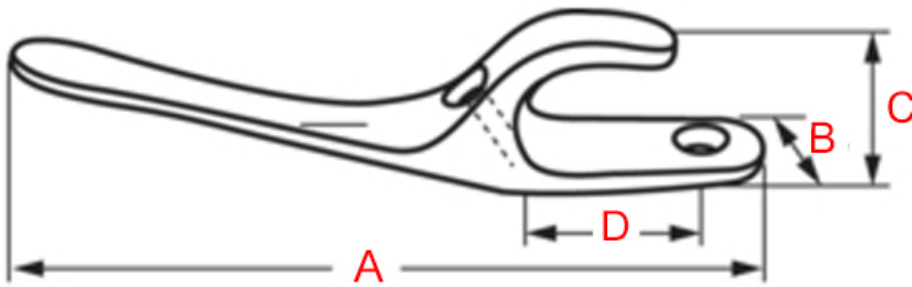

Its elongated shape and distinctive traditional design make it particularly suitable for **classic sailing yachts and wooden boats**, whether for fitting out or restoration.

With no moving parts, this cleat provides a simple and direct means of securing a line. It is available in five sizes to suit different rope diameters. Choosing the correct size is essential to ensure a secure hold and easy handling.

Product description:

Frequently asked questions

- 1. Which screws should I order to secure this cleat?
 - To secure this cleat, you can use either bronze wood screws or bronze machine screws with matching nuts and washers.

Please note that the combination of bronze, brass and wood is not recommended for outdoor applications. We therefore advise using bronze or, where appropriate, stainless steel fixings.

- 2. Is this cleat available in other finishes?
 - This bronze jamming cleat can be supplied with a chrome-plated finish upon request, with a lead time of approximately 3 weeks.

-
- 3. Can this cleat be made to measure?

- This cleat is not available in other standard sizes. However, we can manufacture it to your specifications. Please contact us by email for a quotation.

Good to know

This jamming cleat is handcrafted using century-old moulds, a traditional manufacturing process that may result in slight variations in the bronze. These characteristics give each piece its own unique character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, preserving the quality and integrity of the material over time.
