Tufnol cam cleat

Product attributes:

Diameter: 8-10, 12-14

Product codes:

Reference: 45014/XX
EAN13: -
UPC: -

Product features:

Manufacture: Netherlands

Product short description:

This **HYE Celoron cam cleat** quickly grips a sheet, halyard or other control line without the need to belay it around a conventional cleat. Its two **spring-loaded serrated jaws** grip the rope under tension and release it for adjustments.

Mounted on a base plate with **three fixing points**, it provides reliable holding power in a compact format. Celoron, a traditional marine composite, offers good resistance to wear and marine conditions.

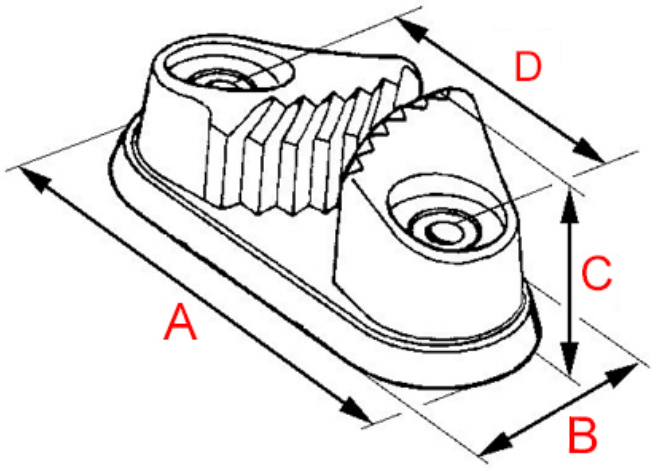

Available for rope diameters of **8–10 mm or 12–14 mm**, depending on size, it is suitable for fitting out and restoring **classic sailing yachts and traditional boats**. Choosing the correct size makes gripping and releasing the rope easier.

Product description:

Specifications

- Celoron jamming cleat
- Composite material made from phenolic resin reinforced with cotton fabric
- High mechanical strength and excellent resistance to wear, moisture and marine conditions

- British-made deck hardware
- For classic or traditional boats
- Fixing screws not included

Frequently asked questions

- 1. Which screws should I order to secure this cleat?
    - You can use either bronze or stainless steel fixings. Bronze screws are available to order on our website.
- 2. Is this jamming cleat available in other materials or finishes?
    - This jamming cleat is not available in other materials or finishes.
- 3. Can this jamming cleat be made to measure?
    - This Celoron jamming cleat cannot be made to measure.

Good to know

Unlike cast metal fittings, this jamming cleat is made from a phenolic laminate reinforced with layers of cotton fabric. This rigid composite offers excellent mechanical strength, dimensional stability and resistance to abrasion, making it particularly suitable for securing ropes on board.

Celoron also performs well in damp and marine environments. Its resistance to wear and moisture makes it a reliable material for traditional deck hardware, even with frequent use.
