Bronze bollard straight arms

Product attributes:

Size: 300 mm, 450 mm

Product codes:

Reference: 1127/BR/R/XX
EAN13: -
UPC: -

Product features:

Composition: Bronze
Manufacture: England

Product short description:

This **solid bronze angled mooring bollard** features two outward-leaning uprights topped with overhanging circular heads. The space between them allows turns of mooring line to be arranged and mooring eyes to be slipped over the heads.

Both posts stand on a rectangular base with six fixing holes. Given the mooring loads involved, installation requires a sufficiently reinforced structure and fixings suited to the mounting surface and expected loads.

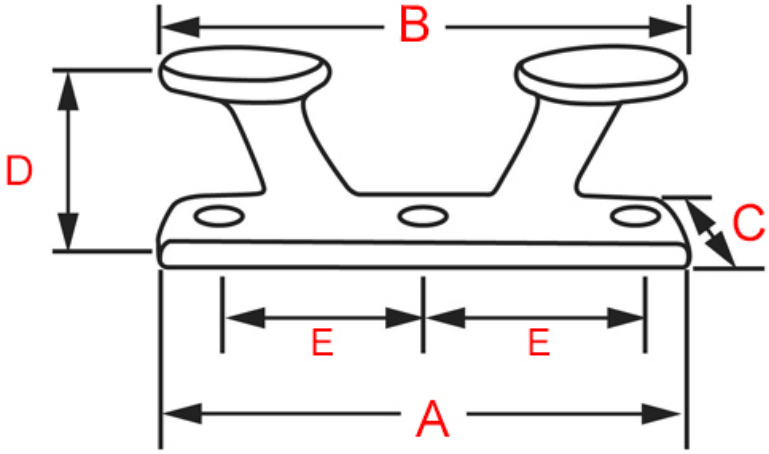

Available in **300 and 450 mm**, this bollard is suitable for fitting out classic boats or replacing existing hardware. Its angled uprights distinguish it from straight bollards while retaining the traditional twin-post arrangement.

1127/BR/450	457 x 140 mm	450 mm	165 mm		12 mm

Frequently asked questions

- 1. Which screws should I order to secure this bollard?

    - To secure this bollard, you can use either bronze wood screws or bronze machine screws with matching nuts and washers.

      For outdoor and marine applications, we recommend using bronze fixings or, where appropriate, stainless steel fixings.

- 2. Is this bollard available in other finishes?

    - This solid bronze angled mooring bollard can be supplied with a chrome-plated finish upon request, with a lead time of approximately 3 weeks.

- 3. Can this bollard be made to measure?
    - This bollard is not available in other standard sizes. However, we can manufacture it to your specifications. Please contact us by email for a quotation.

Good to know

This angled mooring bollard is handcrafted using century-old moulds, a traditional manufacturing process that may result in slight variations in the bronze. These characteristics give each piece its own unique character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, preserving the quality and integrity of the material over time.
