
Bronze cross bollard

Product attributes:

Size: 118 mm, 187 mm

Product codes:

Reference:

1137/BR/XX

EAN13: -

UPC: -

Product features:

Manufacture: England

Product short description:

This **solid bronze cross-shaped mooring bollard** features a central post topped with a circular head and two horizontal arms extending from its middle. This arrangement provides several points for belaying a mooring line and allows a mooring eye to be slipped over the upper head, depending on the direction of the line.

The crossarms have projecting ends that help retain and arrange turns of rope. The rectangular base has four fixing holes and must be secured to a reinforced area of the deck, using fixings suited to the expected loads.

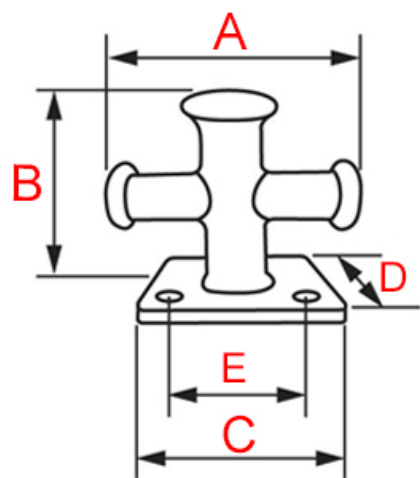

Available in two sizes, this cross-shaped bollard is suitable for replacing a fitting of the same design on an older boat, provided the dimensions and mounting position match.

Product description:

Specifications

- Cross-shaped mooring bollard in solid bronze
- British-made deck hardware

- For classic or traditional boats
- Fixing screws not included

Frequently asked questions

- 1. Which screws should I order to secure this bollard?
 - To secure this bollard, you can use either bronze wood screws or bronze machine screws with matching nuts and washers.

For outdoor and marine applications, we recommend using bronze fixings or, where appropriate, stainless steel fixings.

- 2. Is this cross-shaped bollard available in other finishes?
 - This solid bronze cross-shaped bollard can be supplied with a chrome-plated finish upon request, with a lead time of approximately 4 to 6 weeks.

-
- 3. Can this bollard be made to measure?
 - This cross-shaped bollard cannot be made to measure.

Good to know

This cross-shaped bollard is handcrafted using century-old moulds, a traditional manufacturing process that may result in slight variations in the bronze. These characteristics give each piece its own unique character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, preserving the quality and integrity of the material over time.
