Bronze mooring bit

Product attributes:

Product codes:

Reference: 1150/BR
EAN13: -
UPC: -

Product features:

Height: 110 mm
Plate dimensions: 125 x 125 mm
diameter of screws: 8 mm
Manufacture: England

Product short description:

This **110 mm solid bronze anchoring bitt** features a rectangular upright post with a horizontal crossbar beneath its head. A mooring line or anchor rode can be belayed around the post, with the crossbar helping to arrange and retain the turns.

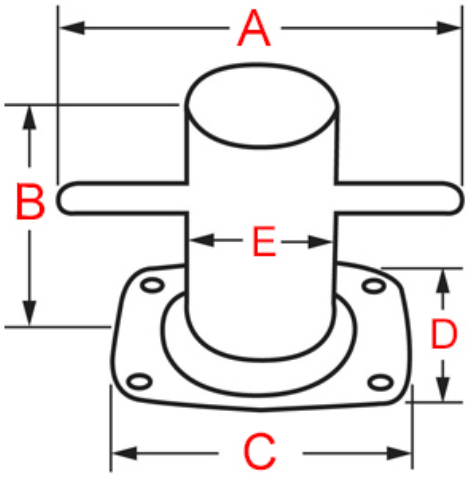

Unlike twin-post bollards, the line is secured around a single vertical post. The square base plate has four fixing holes for deck mounting. Given the loads involved, installation requires a reinforced structure and, depending on the construction, a backing plate to distribute the forces.

This traditional bitt is particularly suitable for replacing a fitting of the same design when restoring an older boat.

Frequently asked questions

- 1. Which screws should I order to secure this mooring bollard?

    - To secure this mooring bollard, you can use either bronze wood screws or bronze machine screws with matching nuts and washers.

      For outdoor and marine applications, we recommend using bronze fixings or, where appropriate, stainless steel fixings.

- 2. Is this mooring bollard available in other finishes?

    - This solid bronze mooring bollard can be supplied with a chrome-plated finish upon request, with a lead time of approximately 4 to 6 weeks.

- 3. Can this mooring bollard be made to measure?

    - This mooring bollard cannot be made to measure.

Good to know

This mooring bollard is handcrafted using century-old moulds, a traditional manufacturing process that may result in slight variations in the bronze. These characteristics give each piece its own unique character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, preserving the quality and integrity of the material over time.
