 - This cleat is not available in sizes other than those listed above.
- 3. Is this cleat available in other materials?

-
- We also offer a wide range of cleats in polished bronze and polished brass on our website.

Good to know

This classic cleat is made from **varnished solid ash wood**, a timber valued for its mechanical strength and suitability for marine applications. The varnish provides **lasting protection against moisture, wear and exposure to the elements**.

Varnished ash is particularly appreciated in traditional marine fittings for its **strength and durability**, providing a reliable hold for ropes even with frequent use on traditional boats, classic sailing yachts and wooden vessels.

To keep the cleat in good condition, **regular maintenance** is recommended, including light sanding and touching up the varnish when necessary to extend its service life.
