Bronze handed lipped fairlead

Product attributes:

Side: Left hand, Right hand
Size: 100 mm, 150 mm, 200 mm

Product codes:

Reference: 1113/BR/XX
EAN13: -
UPC: -

Product features:

Composition: Bronze
Manufacture: England

Product short description:

This **solid bronze angled lipped fairlead** is designed for mooring lines led off the deck at a lateral angle. Unlike a straight fairlead, its angled cheeks guide the change of direction. **The downward-projecting lip protects the deck edge** and reduces chafing against the wood, unlike the version without a lip.

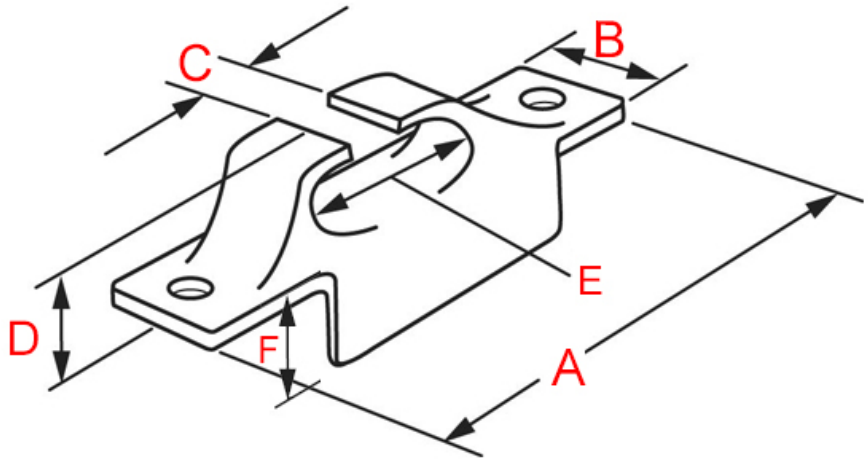

Available in **port-hand or starboard-hand versions**, it is selected according to the line's route towards the quay and the cleat or mooring bitt. Its open groove allows the line to be inserted from above.

Available in **100, 150 and 200 mm**, it suits the **deck hardware** of classic boats. Choose the size according to the mooring line diameter and lead angle.

Product description:

Specifications

- Angled lipped fairlead in solid bronze
- British-made deck hardware
- For classic or traditional boats
- Fixing screws not included

Frequently asked questions

- 1. Which screws should I order to secure this fairlead?

    - To secure this fairlead, you can use either bronze wood screws or bronze machine screws with matching nuts and washers.

      For outdoor and marine installations, we recommend bronze fixings or, where appropriate, marine-grade stainless steel fixings. The type of fixing should be selected according to the mounting surface and expected loads.

- 2. Is this angled lipped fairlead available in other finishes?

    - This solid bronze angled lipped fairlead can be supplied with a chrome-plated finish upon request, with a lead time of approximately 3 weeks.

- 3. Can this fairlead be made to measure?
    - This angled lipped fairlead cannot be made to measure.

Good to know

This angled lipped fairlead is handcrafted using century-old moulds, which may result in slight variations in the bronze. These characteristics give each piece its own distinctive character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, helping preserve the quality and integrity of the material over time.
