Bronze lock over handed lipped fairlead

Product attributes:

Side: Left hand, Right hand
Size: 100 mm, 150 mm, 200 mm

Product codes:

Reference: 1115/BR/XX
EAN13: -
UPC: -

Product features:

Composition: Bronze
Manufacture: England

Product short description:

This **solid bronze crossed lipped fairlead** is designed for mooring lines led at an angle to the deck edge. Its two curved, overlapping cheeks guide the line as its lead angle changes, while allowing it to be inserted from above.

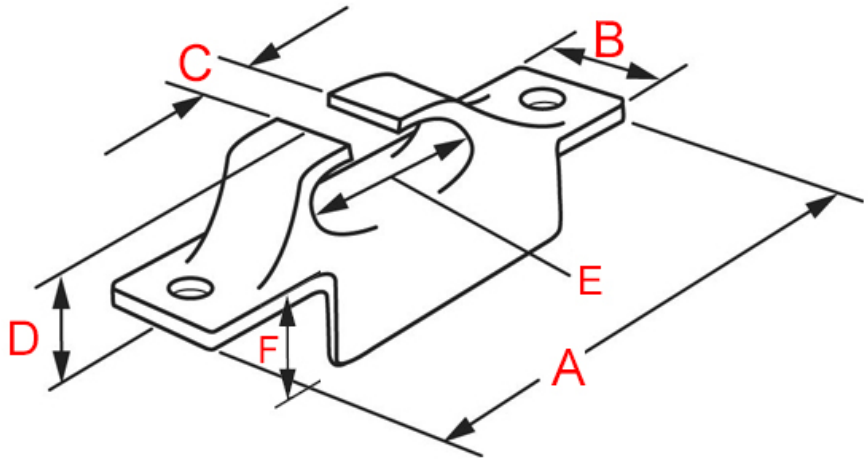

Available in **port-hand and starboard-hand versions**, it is installed according to the direction of the line towards the quay. Its **downward-projecting lip** covers the deck edge, reducing chafing against the wood, unlike a fairlead without a lip.

Available in **100, 150 and 200 mm**, it suits the deck hardware of classic sailing yachts. Choose the size according to the line diameter and lead angle, taking into account its route towards the mooring point on board.

1115/BR/200	203 mm	28 mm	42 mm	30 x 90 mm	172 mm	6 mm

Frequently asked questions

- 1. Which screws should I order to secure this fairlead?

    - To secure this fairlead, you can use either bronze wood screws or bronze machine screws with matching nuts and washers.

      For outdoor and marine installations, we recommend bronze fixings or, where appropriate, marine-grade stainless steel fixings. The type of fixing should be selected according to the mounting surface and expected loads.

- 2. Is this crossed lipped fairlead available in other finishes?

    - This solid bronze crossed lipped fairlead can be supplied with a chrome-plated finish upon request, with a lead time of approximately 4 to 6 weeks.

- 3. Can this fairlead be made to measure?

- This crossed lipped fairlead cannot be made to measure.

Good to know

This crossed lipped fairlead is handcrafted using century-old moulds, which may result in slight variations in the bronze. These characteristics give each piece its own distinctive character and authenticity.

Solid bronze offers excellent resistance to weathering and marine conditions, helping preserve the quality and integrity of the material over time.
