Side fitting stemhead roller in bronze

Product attributes:

Diameter: 8 mm, 10 mm

Product codes:

Reference: 1110/BR/XX
EAN13: -
UPC: -

Product features:

Composition: Bronze
Manufacture: England

Product short description:

This **solid bronze side-mounted anchor roller** guides the anchor chain at the bow during lowering and retrieval. Unlike a roller fitted on top of the deck, its mounting plate allows **installation on the side of the bow**, where the chain runs off-centre.

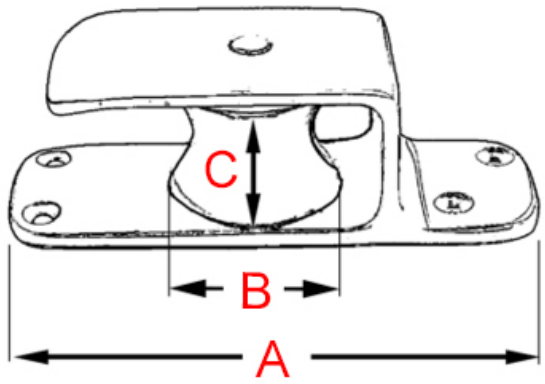

Its **rotating sheave**, set between two cheek plates, guides the links and reduces rubbing against the hull. The curved outer cheek helps keep the chain in place.

The fitting must be secured to a strong support and aligned with the windlass. Designed for **8 or 10 mm chains**, it is part of the **anchoring hardware** used on classic sailing yachts and traditional boats.

Product description:

Specifications

- Side-mounted anchor roller in solid bronze
- British-made deck hardware
- For classic or traditional boats
- Bronze fixings not included

Reference	Length (A)	Diameter (B)	Height (C)	Bolt

1110/BR/10	185 mm	50 mm	45 mm	12.5 x 180 mm

Frequently asked questions

- 1. Which fixings should I use to install this side-mounted anchor roller?

    - Depending on the mounting surface, you can use bronze wood screws or bronze machine screws with matching nuts and washers for through-bolted installation. The diameter and strength of the fixings must be suitable for the fitting and expected loads.

      Please note: on wooden boats, moisture and salt water can promote electrochemical

reactions involving metal fittings and timber, potentially causing deterioration of the wood around the fixings.

We recommend using compatible marine-grade fixings, avoiding combinations of dissimilar metals wherever possible, and ensuring the installation is properly sealed.

- 2. Is this side-mounted anchor roller available in other finishes?
    - This side-mounted anchor roller is not available in other finishes.
- 3. Can this side-mounted anchor roller be made to measure?
    - This side-mounted anchor roller cannot be made to measure.

Good to know

This side-mounted anchor roller is handcrafted using century-old moulds, which may result in slight variations in the bronze. These characteristics give each piece its own distinctive character.

Solid bronze offers excellent resistance to weathering and marine conditions, helping preserve the quality and integrity of the material over time.
