

Wood primer mono-component 127 white color

Product attributes:

Color: White
Packaging: 0,75 L, 2,5 L, 16 L

Product codes:

Reference: P/101/PLX/XX
EAN13: -
UPC: -

Product features:

Packing: 0.75L, 2.5L and 16L
Properties: Coverage of 6 to 8m²/L

Product short description:

Wood primer 127 white mono-component is a micro-porous alkyd resin for new and cleaned wood.

Thanks to its tiny particle size it penetrates perfectly well and deep into wood structure (after dilution).

Applied on dry wood it must be recovered with an unsealed finish like PLASTILUX.

Nourishes wood and protects it against corrosion and rotting.

Replaces lead minium (strictly forbidden today).
