
Epifanes bi-component polyurethane varnish shiny finish

Product attributes:

Product codes:

Reference:

VM/EPI/PU/BRI

EAN13: -

UPC: -

Product features:

Packing: 0.75L

Properties: Covering capacity of 9m²/pot

Use precaution: Recoatable after 24 hours at 18°C.

Hue: Glossy

Product short description:

Epifanes bi-component polyurethane varnish with a matt finish, based on saturated polyester resin.

This varnish is **very resistant to bad weather conditions**, to **UV** and to **water abrasion**. Can be applied on existing polyurethane varnish or untreated wood (for example marina plywood). May be used as primer in a mono-component system, as protection layer or between a resin epoxy system.

Internal or external application above the waterline.

Temperature must be between 15°C and 27°C.

Température d'application : comprise entre 15°C. et 27°C.

Diluent brush-application brosse : Epifanes diluent PU brush. No need for sanding if recovered beneath 72h.

Recoverable after 24 hours at 18°C (65°F).
