
406 colloidal silica por epoxy

Product attributes:

Product codes:

Reference:

P/118//WS/CH406

EAN13: -

UPC: -

Product features:

Packing: 60 gr

Use precaution: Add 3 to 8% by weight to the epoxy mixture

Hue: off-white

Product short description:

WEST SYSTEM filler for epoxy with colloidal silica of 60gr

Strong thickening additive to mix with your epoxy resins. It is generally used to manage viscosity and thus prevent run-off during gluing, filling of voids and fillets.

It creates a harder and smoother mixture and is very versatile.
