
Beige braided recycled RPET-Line

Product attributes:

Rope Diam: 8 mm, 10 mm, 12 mm

Product codes:

Reference: 2530/RPET/08
EAN13: -
UPC: -

Product features:

Product short description:

Beige braided rope 100% made from recycled PET bottles. These PET bottles are all collected and processed into rope in the Netherlands.

Depending on the diameter, the cover is braided in 16, 24, or 32 strands, making it easy to splice. This rope has good abrasion resistance, chemical resistance, and excellent UV resistance.

The rPET-Line can be used as sheets and mooring lines for boats, as well as a hoisting rope and for many other applications.

Wherever you use it, you know you're contributing to a more sustainable world. A circular future through the reuse of raw materials! It takes 40 bottles to create 1 kg of rope.

Elongation (at 20% break) is 3%.
