Product features:

Product short description:

Lot of 6 second-hand solid bronze rope clutches (cam cleat type), in 130x45mm, in perfect working condition. Requires only a simple cleaning.

These solid bronze jaw-type clamping cleats are designed for rapid locking of rope under load, for diameters from 8 to 10 mm.

Assembly mounted on a rectangular base plate with through-drilling for through-bolt fixing, with two guiding arms in the form of loops ensuring correct alignment of the line at entry and exit.

Release by reverse pull, smooth and immediate. No deformation, shafts and moving parts free, fully operational mechanism.

Suitable for standard manoeuvres on classic sailing yachts: light halyard trimming, boom vang tackle, or securing control lines and small lashings. Robust component, built for long service life in a marine environment.
