# 103 mm surface-mounted Bronze deck prism

## Product attributes:

## Product codes:

Reference:

OCCAS/CERCLE/1

EAN13: -

UPC: -

## Product features:

Composition: Bronze

Diameter: 103mm (glass)

Base diameter: 123mm

Projection: 16 mm

## Product short description:

This antique bronze deck prism is fitted with a moulded glass lens featuring concentric rings, allowing daylight to pass below deck while retaining the distinctive character of traditional yacht fittings.

The bronze frame displays an aged patina consistent with its age and long service in a marine environment. The original glass has been preserved and shows a few chips along its edge, which do not affect its appearance once installed.

With its shallow profile and surface-mounted design, this deck prism retains the simplicity and functional elegance characteristic of period marine hardware.

Dimensions: overall diameter 123 mm, glass diameter 103 mm, projection 16 mm.

Genuine antique second-hand item, sold in its original condition.
