# West System Epoxy resin rapid hardener 105/205

## Product attributes:

## Product codes:

Reference:

P/118/WS/205

EAN13: -

UPC: -

## Product features:

Packing: 500 gr + 100 gr

Properties: For 1kg: 6.5 / 7.5m<sup>2</sup> on porous surface and 8.5 / 9.5m<sup>2</sup> on non-porous surface.

## Product short description:

West System Epoxy resin base (105) + quick hardener (205).

205 hardener is used for quick hardening.

The mixture catalyzes in 10 minutes and becomes ultra resistant.

You can add additives or fillers to make fillets (additives 406) or plaster (additives 407).

5/1 proportion

Hard on the surface (at 21 ° C) in 5 to 7 hours, and hard on the core (at 21 ° C) in 5 to 7 days.

Minimum working temperature of 5 ° C not to be exceeded.
