## Product features:

Packing: 1 L  
Cleaning: 2 to 6 recommended layers  
Properties: Coverage of 6 m<sup>2</sup> per liter  
Use precaution: Recommended temperature for the application: between 10 and 30°

## Product short description:

Mono-component boat varnish **high resistance** for new wood ships.

Thanks to its UV filters it **protects wood from aging**.

This transparent marina varnish with a light amber hue is composed of **phénolic resin and Tung oil**.

Its commonly used in Italy on traditional RIVA wood ships.

## Application :

Sand with sandpaper 120 (on new wood) and with 280 (on painted wood).

Dry after 3 hours at 20C° between each layer.

- Complete drying after 24 hours at 20C°.
